EMD and Seat Selections on JetBlue Bookings Made through the GDS

In August 2021, JetBlue introduced Electronic Miscellaneous Document (EMD) functionality and updated its seat map to an all “chargeable” version. **An EMD is now required to be issued for all free seat and paid seats secured through the GDS.**

For fare options that include a free seat assignment, the seat map will show a fee, however, the charge will be \$0 (except for Even More® Space and Mint Studio™ seats). An EMD must be issued for all seats. Failure to issue an EMD will result in the seat assignment auto-cancelling in the booking.

JetBlue Adds Third BlueCity in Mexico with Nonstop Flights from New York's JFK to Puerto Vallarta

JetBlue has officially launched service between New York's John F. Kennedy International Airport (JFK) and Puerto Vallarta's Gustavo Diaz Ordaz International Airport (PVR).

Puerto Vallarta service will operate four times weekly, offering JetBlue customers an all-new destination and even more of the airline's award-winning service and low fares.
