More on JetBlue

JetBlue's transatlantic service in Boston builds on the success of the airline's flights between New York and London, which first launched in August 2021 with Heathrow service, followed by Gatwick service in September 2021. JetBlue's entrance into the transatlantic market introduced a long overdue, new era of customer-focused, low-fare travel for leisure and business travelers. With the expansion of transatlantic service in Boston, JetBlue is set to bring even more affordable fares and incredible service to customers with up to four daily flights between the U.S. and the U.K.

Flights on both Gatwick and Heathrow routes will operate daily on JetBlue's new Airbus A321 Long Range (LR) aircraft with 24 redesigned Mint suites, 114 core seats and the sleek and spacious Airspace cabin interior. The A321LR platform – offering the range of a wide-body but with the economics of a single-aisle aircraft – allows JetBlue to effectively compete with the airline's award-winning service and attractive fares on flights between Boston and London.

UK - originating travelers flying to Boston from London Gatwick start at £349 roundtrip for the airline's award-winning core experience and at £1,449 for JetBlue's premium Mint® experience. Roundtrip fares to Heathrow start at £399 for core and £1,499 for Mint all now available to book in your GDS.
